

HR & Employee Training Policy

This policy sets requirements for employee training and compliance. Upload this PDF to demonstrate multiple policies and rule extraction.

1. Mandatory Training Completion

All employees must complete security and compliance training within 30 days of joining. The `training_completed` field must be true by the deadline. Managers are responsible for tracking completion.

2. Background Checks

Employees with access to customer data must have a completed background check on file. The `background_check_status` field must equal 'cleared' before access is granted.

3. Access Review

Access rights must be reviewed quarterly. Last access review date shall not be older than 90 days. Any employee whose access has not been reviewed within this period must be flagged.

4. Data Handling Certification

Personnel handling personal data must hold a valid `data_handling_certified` status. Certification expires after 12 months and must be renewed.
